Public Mental Health Learning Community Learning Set

Welcome, and thank you for joining today's event!
We will start at 14:00

Our speakers today include:

Tom Ayers
Director |
National Collaborating
Centre for Mental Health
(NCCMH)

Geraldine Strathdee CBE OBE
Hon FRCPsych

Dr Jenny ShandAssociate Professor of Health Services and Population Research | UCL Director | NIHR Rapid Service Evaluation Team (RSET)

Housekeeping points before we get started

Recording the session

If not speaking, please mute

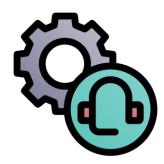

Camera on please, if comfortable to

Please ask Questions

- Raise your hand
- Use the chat function

Tech issues, please contact public.MH@rcpsych.ac.uk

Shared principles

Listen with respect and openness

We seek to value learning from different people and stay open to new ways of doing things.

Confidentiality

People may share something they wish to be kept confidential. We require everyone's agreement not to share anyone's information without their permission.

Collaborate

We seek to make decisions by consensus. Everyone's input is **equally** valued.

Shared principles

Contribute

We seek to share ideas, ask questions and contribute to discussions. We can also choose not participate at any stage.

Disagree with the point - not the person

We seek to resolve conflicts and tensions.

Use plain language

We seek first to understand, then to be understood. If possible, avoid using jargon and explain acronyms if they must be used.

Today's agenda

Time	Speaker	Affiliation	Topic		
14:00-14:10	Tom Ayers	Director National Collaborating Centre for Mental Health (NCCMH)	Welcome and introductions		
14:10-14:55	Dr Jenny Shand	Associate Professor of Health Services and Population Research UCL Director NIHR Rapid Service Evaluation Team (RSET)	Building capacity for Public Mental Health Research through MH- ALL Followed by Q&A		
14:55-15:00		Break (5min)			
15:00-15:55	Geraldine Strathdee CBE OBE Hon FRCPsych		Using Data to Understand Public Mental Health Towards ACTION Followed by Q&A		
15:55-16:00	Tom Ayers		Thank you and closing remarks		

Building Capacity for Public Mental Health Research through MH-ALL

Dr Jenny Shand

Associate Professor of Health Services and Population Research | UCL

Director | NIHR Rapid Service Evaluation Team (RSET)

Building capacity for public mental health research through MH-ALL

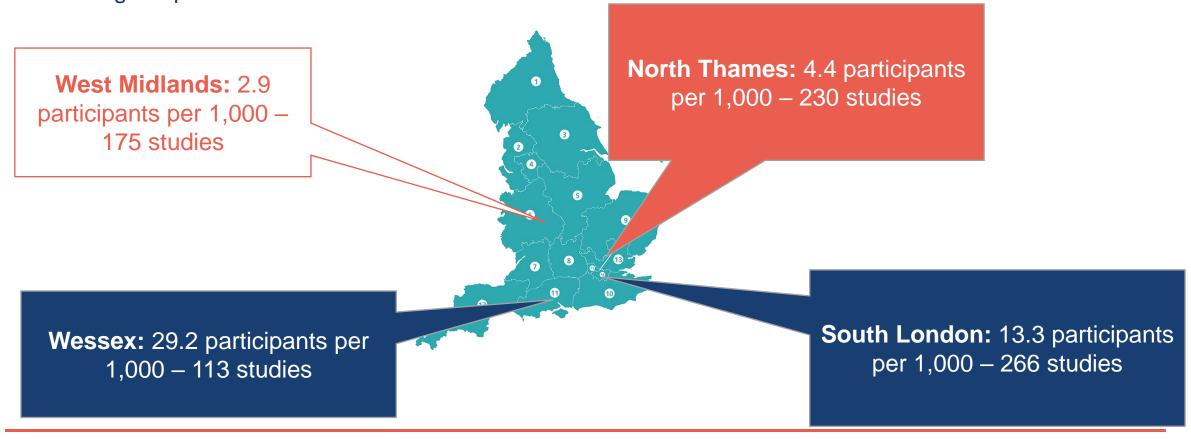

Thursday 17th October 2024

Why?

Number of participants recruited between 19/20 and 23/24 to mental health studies split by Local Clinical Research Network. Number of studies represents the number of studies that recruited during the period

Why?

Research engagement by healthcare organisations and staff is likely to have a positive impact on patient outcomes and processes of care

Boaz A, Goodenough B, Hanney S, Soper B. If health organisations and staff engage in research, does healthcare improve? Strengthening the evidence base through systematic reviews. Health Res Policy Syst. 2024 Aug 19;22(1):113. doi: 10.1186/s12961-024-01187-7. PMID: 39160553; PMCID: PMC11331621.

MH-ALL: Mental Health Research for ALL

Aim To tackle the barriers to mental health research participation for staff and communities, to ncrease the amount of mental health research participation in parts of East London and Essex.

Background

Evidence shows that communities living in some of the most disadvantaged areas of England have some of the highest numbers of people affected by poor mental health. However, they are also less likely to use mental health services, have poorer access to high-quality care, and are underrepresented in mental health research. Staff who work in mental health are also unequally represented, and there is a need to improve research opportunities for allied health and community staff.

What we did

What we learnt

Understand Training need survey across NHS Mental Health Trusts (n=65 responses) In-depth stakeholder interviews Scoping review Roadshow with Mental Health Providers, Local Authorities and Voluntary Sector Organisations to build connections

24 months

- Developed bespoke training (10 modules) addressing the gaps identified in the needs assessment Developed 3 funded opportunities
- internships, career fellowships, springboard awards · Recruited three cohorts of each over
- Worked with NHS Mental Health Trusts to develop Research Champion Networks within and across organisations Bespoke development of Staff Research Champion - co-created with 24 peer

Sustain

- Supported an alumni network (awardees mentors, training participants, lived
- experience partners) · Established community of practice with lived experience colleagues embedded

Inclusive partnership with staff from diverse roles and backgrounds and people with lived experience of mental health underpinned the approach - grounding our approach in values and principles, as opposed to processes, has made the biggest impact and enabled flexible, meaningful collaboration.

- Not all staff see themselves as potential research contributors - the term "research" is not accessible to all
- Staff identified protected time supportive management and inclusive research environments as key facilitates for engagement in research
- Specific skills gaps were identified to shape development of training modules
- · Training increased participants' research readiness
- · Offering short modules and multiple formats (in person, online, self-paced) increased reach and participation
- · The positioning of opportunities and application support was critical for inclusion
- · Fellowships were more successful for mobilising participation
- · Staff research champion roles are diverse in their definition and approach - cross organisation learning has supported sharing of resources and refining the approach
- Peer support workers are uniquely positioned - bridging staff and lived experience colleagues. Peer support workers have no clear pathways into funding for research opportunities

Impact

Training • 182 attended training ↑ 47% participants' confidence in discussing research with peers. • ↑ 39% readiness to contribute actively within research networks.

Funded opportunities 14 Internships 9 Fellowships 143 applicants Applicant roles included: • 74% no experience of submitting Public Health research applications Social care workers

- 70% pre-doctoral
- 46% non-white ethnicity • 9% with a disability

Networks Alumni Network

- 169 members
- People's Panel -17 members, public, staff, awardees, academics
- Staff Research Champion Network - 53 participants across mental health trusts clinical research network 45% are peer support workers.

Community nurses

peer support workers

Impact

35 awardees

Sedina Lewis is searching

for data-driven approaches to children and young people's mental health

Public Health Specialist, London Borough of Havering

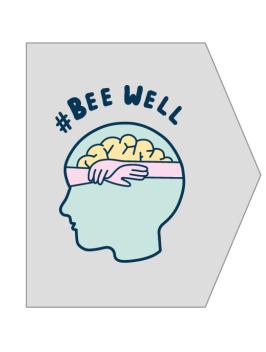

"Being part of the internship made such a big difference in providing that space for me to actually think about research and my own personal development and my research skills."

Research

- Offered one day of protected time for research at Havering Borough Council;
- Initiated work based research group;
- Exploring PhD options

Youth Census Survey in Havering

Set up and Engagement

- Schools
- Council

Survey Development

- Survey adaptation
- Digital survey

- Survey delivery
- Data analysis

Dissemination

and Action

School reports

Neighbourhood dashboard

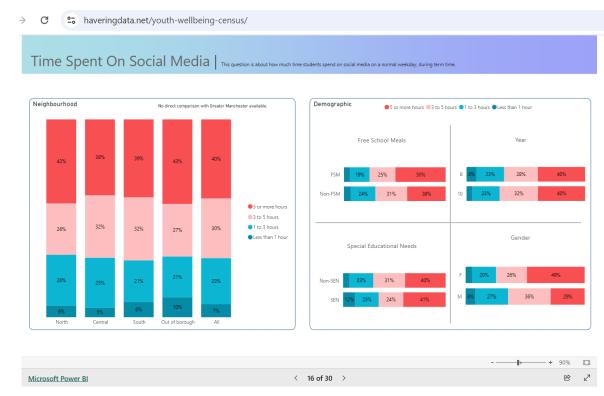

Child Outcomes Research Consortium (CORC)

Youth Census Survey in Havering

A total of **10** schools took part in the Havering Youth Wellbeing Census during June and July 2023.

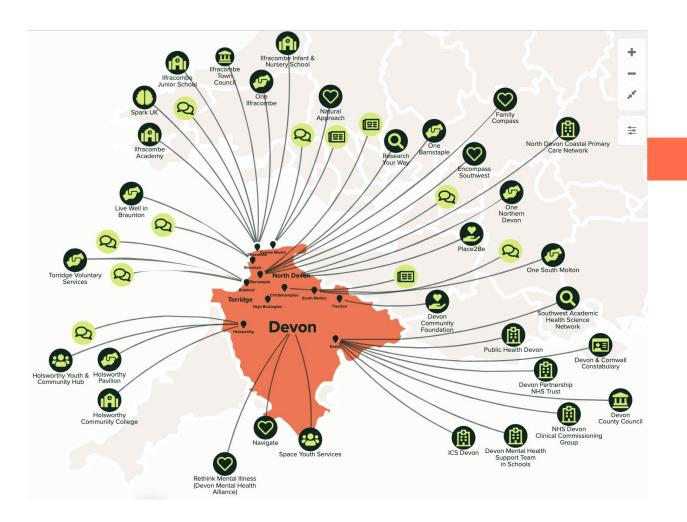

2,287 students across year groups 8 and 10, representing **36%** coverage of the target demographic.

https://www.haveringdata.net/youth-wellbeing-census/

Kailo

- Diverse employment opportunities;
- Fostering identify and belonging;
- Social relationships supporting mental health literacy

- Violence and safety;
- Diverse range of positive activities.

OPEN LETTER

Kailo: a systemic approach to addressing the social determinants of young people's mental health and wellbeing at the local level [version 1; peer review: 3 approved, 1 approved with reservations]

The next phase of MH-ALL

To maintain and expand momentum across NT to further enhance MH research capacity across diverse staff groups, creating fresh approaches through improving access and enhancing the diversity of those **conducting research**, with a view to improving access and diversity of those **participating in research**.

Objectives

- 1. To scale and spread reach of MH specific ARC-NT Academy **training**, to build research capability.
- 2. To fund further cohorts of MH **fellows**, to build research capacity and create research paths for diverse staff roles.
- 3. To design and deliver a bespoke programme for **Peer Support Workers**, who are uniquely placed to ensure research is accessible and meets population needs.

Training – Expanding our reach

Pathways into research and developing research ideas for funding

Training for Staff Research Champions

Public and Patient Involvement and Engagement (PPIE) in research

Radical ethics in MH research

Cultivating a research culture within organisations

In person – East London and Essex

On-line - live

Online - Self-paced courses

Fellows: Career Development Fellowships

AIMS

- To develop research skills
- To create a funding application for a research project

All staff groups (6)

Priority to East London and Essex applicants

Basic research understanding and experience required

In person attendance required

Peer Support Workers (10)

National applicants

No prior research experience required

Online with two in-person events in London

THANK YOU!

Questions from the audience

Using Data to Understand Public Mental Health Towards ACTION

Geraldine Strathdee CBE OBE Hon FRCPsych

Using Data and Information to understand public mental healthtowards action

Geraldine Strathdee CBE, OBE, Hon FRCPsych.

This session

1. Your leadership, value, aims and outcomes

2. Data and information & the Rapid Review insights

3. Learning from population & public health programmes and innovative Case studies

Discussion

Your Leadership 2 minute reflection

Who are you

What are your values

What really matters to you personally and professionally & why

What would your 'excellent' population /public health 'system service look like' for you, your family, your community

What do you most want to change in this role

Your Data and Information

What information do you need

What do you know about the levels of 'need', benchmark standards, effective interventions case studies etc.

Is your 'data' mapped by person pathway or by organizations and systems

Is your design based on 'end user' voices and communities of interest

Learning from 4 decades seeking population health, prevention & optimal equitable outcomes: what worked & what didn't

Early life learning: living with violence, inequalities, lack of access to information, education, employment

Clinical 'borough': reducing suicide rate from double to below expected & population collaborations

London Strategic Health Authority MH MD: 1st mapping MH need, identifiable causes and prevention opportunities, improving standards & accessible information across networks

National PHE clinical lead developing MH intelligence network for Local Authorities & CCGs & JSNA stds; mapping identifiable prevention causes, levels of need, levels of access to effective therapies, outcomes, cost predictions

NCD NHSE & NHIS: promoting commissioning standards for evidence based holistic treatments

CQC Regulatory standards for Public sector Equalities duty information in all providers in all sectors

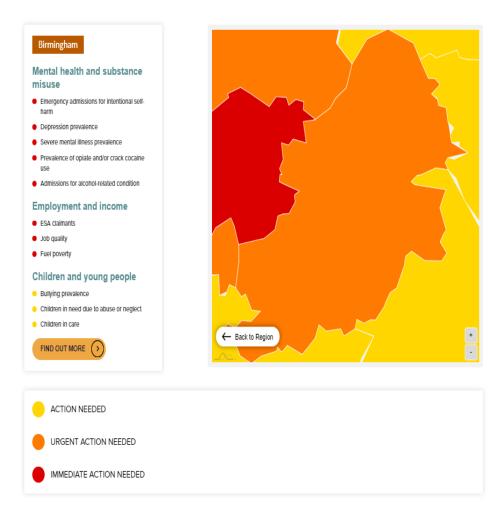

Zero Suicide Alliance + NHS Benchmarking + MH Foundation public health : making public health information accessible & practical primary prevention interventions to MPs, leaders (Ed Davie)

London Region crisis & digital programme: data to understand MH need across 27 A/Es, levels of S 136 & role of digital pathway mapping & digital innovation for primary and secondary prevention

Rapid Review for Government into MH data: findings about MH data; 12 key recommendations, case studies that signpost the hopeful future in prevention and care

Zero Suicide Alliance: Facts for Action Resources

turning data into information and prevention actions

Key aims of the ZSA Facts for Action Resources are to:

Inform and increase awareness of suicide and the factors that may

What are the risk factors for suicide for children and young people?

- 1. Why are they important to consider in suicide prevalence?
- 2. How prevalent are they?
- 3.ZSA Suicide Prevention Resource Map key takeaways
- **1.**How do they occur?
- 5. What are the consequences?
- 5.Impact of COVID-19
- 7. National guidelines for practice
- **3.Key approaches**
- **3.**Case studies
- **10.ZSA Suicide Prevention Resource Map related indicators**
- 11.References

https://www.zerosuicidealliance.com/ZSA-Resources/facts-action-home/children-and-young-people/risk-factors-cyp/mental-health-stress-and-adverse-childhood-events#content4a

Rapid Review 2023: highlights on data & information findings

The data burden is huge and growing, & taking 'time away from care'

Despite the burden, the data often does not "Measure what Matters" to the patients, their families, teams, Boards, ICSs

The data is not often fed back to those that need it to plan their work, to take rapid operational action for safety in 'real time'

Data analytic processes like Spc are helpful but Boards & leaders need benchmarking of performance and innovative solutions Data literacy is a key requested skill by every sector as the basis of safe, equitable care based on the needs of local populations and services

In some providers, still, even the most basic information is not available to patients, their careers and families

Summary: the revolution is progressing in some services and places but equity and equality has a way to go

Commonality Everyone agreed on key issues

- Data burden
- Not measuring what matters
- Need to take control of the wild west of data gathering
- Need to agree Core principle that safest care is therapeutic care
- Need to reduce measuring processes and performance and not therapeutic care and outcomes
- Need faster ways to learn from innovation and safety best practice
- Information needs to be more open and accessible in the spirit of learning including where solutions have been developed

Variability

- There are exceptional examples of excellent safe
 Therapeutic needs-based care and staffing
- There are exceptional innovative people using digital (basic and advanced) to bring together information that triangulates
- There are superb examples of countries that look at data flows and use that data once, rapidly report back in 'real time' & flow into national data systems

Case Studies: 'revolution' examples of innovations in data & digital for safe, secondary and tertiary prevention and effective care

<u>International 5 Rights standards</u>: information gathered by staff ONCE_fed back to teams asap for rapid improvements; flowed nationally for decision makers

<u>Integrated Care System:</u> superb patient-focused, collaboration to reduce by 50% time spent gathering data on processes to free up time for Quality Improvement joint with patients and frontline staff

<u>Early Alert digital information system</u> across 45 wards that measures acuity, risk incidents & workforce; rapid feed back & weekly management support for rapid urgent action to improve safety

<u>Integrated single digital information platform</u> bringing together data on Needs Physical and mental; access to Therapies, measurement of PROMS, CROMS, Outcomes, PREMs, Observations, Incidents, and vital workforce Human factors: staff supported by embedded digital tools for workload reduction & for better information on patient progress

<u>Trust Chairs' use of Closed culture evidence base</u> to make care safer and more equitable and alert early. Support and Empower staff to speak up and out about care standards they want for themselves and their families

12 practical recommendations with ministerial oversight of implementation

National Data review and oversight arrangements

Digital infrastructure and platforms for optimization of collection, integration and use of data for use immediately and to flow to national

Rapid open access and sharing of good practice that has improved

Deaths

Provider Boards membership, safety processes, BAFs, data and digital literacy

Provider Boards and safety and closed cultures priority

Information for patients and carers and Systematic
Implementation of carer standards as a routine

ICS needs assessment and Data literacy training for all ICS system partners

Safe therapeutic estates for mental health

Recognise the key role that carers play in safety

Alliance for Compassionate Care supporting staff in safe care

Carer standards involvement, routine feedback and engagement by ICSs

UNESCO (The United Nations Educational, Scientific and Cultural Organisation) Five Right Principles for the collection and use of data

The x 5 Right principles for the collection and use of data:

- **get the right data**: collect the data that is relevant to safe, therapeutic care
- **get the data right:** collect data with precise definitions and appropriate measurements
- get the data right away: collect data that is timely and current
- get the data the right way: collect data through a rigorous process that can guarantee data quality and ensure consistency & rapid feedback
- get the right data management: collect reliable data that is guaranteed by good quality control conducted by relevant stakeholders

Data & Information revolution: are we finally on track...the vision

- What would the data and information revolution on track look like
 - We would have a national data system that is accountable and delivers the best international standards of data collection and use: the 5 RIGHTS!
 - We would state the Values and purpose of data (and digital) i.e. it's an essential prerequisite to improve the safety, quality and outcomes of care ...
 - We would therefore have the safest, highest quality, best outcomes for patient, highest rated by carers & staff satisfaction services in the world
 - Every single provider would have information for patients, families & staff on their website to provide accessible plain English information toreduce fear, enable the person to make informed decisions about their care
 - All ICS systems would be using the available MH data on their local populations & using that to plan and target their resource allocation across the health social systems and partnership systems
 - All patients would have the information they need
 - Every member of staff would have 30-50% time freed up to care and no duplication of data collection
 - Digital innovations that free up time to care would be equitably available

Rapid Review Resources:

- Rapid review into data on mental health inpatient settings: final report and recommendations - GOV.UK (www.gov.uk)
- Easy Read version

https://assets.publishing.service.gov.uk/media/65f468f8af6a0d001190d511/looking into how information is collected and used in mental health hospitals easy read.pdf

NHS Benchmarking Network Findings Events

Each year the NHS Benchmarking Network delivers a programme of events to showcase the key findings from the most recent data collections.

Alongside the key findings, each event also includes guest speakers to outline current policy or share areas of good practice.

These events aim to offer a learning opportunity alongside the chance to connect with peers.

Upcoming events

October

- 15 Oct Emergency Care Benchmarking Findings
- 16 Oct Pharmacy and Medicines Optimisation Benchmarking Findings
- **25 Oct** NHSBN & Queen's Nursing Institute: Exploring the Landscape of District Nursing in 2023/24
- 30 Oct Adult and Older People's Mental Health Benchmarking Findings

November

- 13 Nov Managing Frailty Benchmarking Findings
- 14 Nov Children and Young People's Mental Health Benchmarking Findings
- 20 Nov Therapies Benchmarking Findings (Adults and Children)
- 29 Nov Healthy Child Programme and Children's Community Nursing Benchmarking Findings

December

- 10 Dec Outpatients Benchmarking Findings
- 12 Dec Intermediate Care Benchmarking Findings

March

 14 Mar Learning Disabilities Specialist Services Benchmarking Findings

NHS benchmarking network information resources

Work programme and the data toolkits which provide easy access to visualise and download data collected as part of our annual and monthly benchmarking projects

IC Benchmarker which is a one-stop easy to use portal of 100s of national, publicly available data sources to support strategic planning – this is a great tool to completement the provider level data we collect in the benchmarking projects

ICB reference group where we are working with member and non-member ICBs – we welcome new members to join.

Contact information more than happy to speak to colleagues so please do share emails.

We are able to **signpost to organisations who are members** as well if colleagues are interested in talking more to existing members.

For any that aren't members, this is a great time of year to join given our annual benchmarking data, reports and events are out now. Membership would support data driven system level discussions with organisations in their patch who are our members.
